

Experience

LANEX CORPORATION

Web Developer (Internship) | SEP 2021 - MAR 2022

- Developed a robust inventory system for monitoring and managing devices

Software Engineer (Full-time) | AUG 2022 - APR 2025

- Built and maintained an app that tracks device software and hardware integrity
- Engineered AI language model prompts to enhance chatbot accuracy and improve customer query resolution rates.
- Created a reusable web application template for AI-driven chatbots, reducing development time for new projects
- Built an ordering portal with full e-commerce features (cart, shipment processing, and container truck delivery visualization), streamlining logistics and improving order tracking efficiency.

NEC CORPORATION

Software Engineer (Contract) | OCT 2022 - MAR 2024

- Optimized and maintained UI Path automations, reducing repetitive manual tasks and improving efficiency
- Created and supported development environments for relational and non-relational databases, ensuring reliable test and production workflows.
- Customized and containerized MongoDB images with Docker to handle specialized business requirements
- Designed and built an automation testing tool, cutting regression test execution time and improving QA efficiency and reliability

Skills

Frontend: VueJS, NuxtJS, Flutter Flow, HTML, CSS

Backend: Laravel, Express, Flask

DevOps: Docker, Kubernetes, Helm,

Databases: PostgreSQL, MongoDB, MySQL

Languages: JavaScript, TypeScript, Python, C, Java, PHP

Automation Tools: Robotframework, UI Path

SCM: Github, Gitlab

Project Management Tools: Jira, Trello

AWS Services: S3

AI: Flowise, OpenAI

Education

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

University of San Carlos - Talamban Campus
Cebu City, Philippines

Publications

AN EMPIRICAL ANALYSIS OF USING BLOCKCHAIN TECHNOLOGY IN E-VOTING SYSTEMS

IEEE - Dec 1, 2021
